

ManageEngine  
Cloud Security Plus

Cloud Security Plus  
**A log management and  
monitoring tool for  
public cloud platforms.**

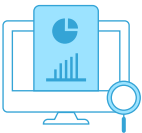

ManageEngine Cloud Security Plus is a cloud monitoring platform that enables you to track, analyze, and react to events happening in your public cloud infrastructure. The solution has a range of out-of-the-box reports, an easy search mechanism, and customizable alert profiles. This enhances business efficiency by providing actionable insights on crucial developments in your cloud environment.

---

### **Support for multiple cloud platforms.**

Cloud Security Plus supports multiple platforms such as Amazon Web Services (AWS), Azure, Salesforce, and Google Cloud Platform. If you have a cloud infrastructure distributed across multiple platforms, all your cloud resources can be monitored from a single interface.

### **Cross platform monitoring.**

With Cloud Security Plus, you can track users across all cloud deployments and generate reports on their activity.

### **Competitive pricing.**

Cloud Security Plus follows an annual subscription model, and customers are charged based on the number of accounts to be monitored rather than the volume of logs generated.

### **Quick deployment.**

Cloud Security Plus deploys easily and starts analyzing logs within minutes of installation. It also comes with a built-in option to forward logs to Syslog servers and Splunk, which correlates real-time data in a searchable repository, if desired.

### **Easy to manage.**

Cloud Security Plus has an intuitive interface that is easy to understand and operate. No extensive domain knowledge is required.

### **Alert profiles.**

Cloud Security Plus has a range of alert profiles that can also be automatically categorized based on severity to help you focus on critical events immediately.

### **Comprehensive reports.**

Cloud Security Plus has a range of predefined reports that can be generated and emailed at specified intervals. These reports can also be exported in PDF, CSV, HTML, and XLS formats.

### **Flexible and easy log search.**

Searching through log data with Cloud Security Plus is simple with support for advanced search options such as wildcard, boolean, phrase, range, and grouped searches.

## **System requirements**

**Processor:** Dual-core

**RAM:** 2 GB

**Disk Space:** 50 GB

**Supported Windows OS versions:** Windows 7 and above, Vista, Server 2008 R2, Server 2012, and Server 2016.

**Supported web browsers:** Internet Explorer 9 and above, Mozilla Firefox 3 and above, and Google Chrome.

## ManageEngine® Cloud Security Plus

The easy deployment, adaptive scalability, and economical costs of cloud platforms have many organizations adopting it. However, meeting compliance needs and growing security concerns of data loss and unauthorized access, hinders the tapping of the platform's full potential. Cloud Security Plus is your silver lining, as it combats these security concerns. It gives complete visibility into AWS, Salesforce, Google Cloud Platform, and Microsoft Azure cloud infrastructures. The comprehensive reports, easy search mechanism, and customizable alert profiles enable you to track, analyze, and react to events happening in your cloud environments.
